Before the next challenge.

My name

Daniel P

A question I want to resolve

how is life a problem with many solutions but still cant be solved

Recall. Question. Recalibrate.

What have I completed?

i did a mini menu for a website by using html and C# and used many different things to build the website like js htlm and css granted it got deleted cause i lost my computer

My explanation of classes, objects, data and actions

the website i mentioned is similar to the game engine cause it takes a lot of time to do and is basically time consuming but worth it at the end

My questions, answers and remaining uncertainty

how long did it take you to remember each coding language you know > my answers is none cause im slow at time but can be really smart at the same time> this world is my only remain uncertainty

My personal GitHub repository URL

https://github.com/Midnight31-cyber

Readiness check

i ran the code and pushed the screen shoots through

Replace Chapters with Pipelines

Attention First, Chapter 3, pp. 37–41 (132-page edition).

Bring something to the summit.

The connection across the readings

Not recorded

Evidence I am ready to show

Not recorded

My board in words

Not recorded

Choose where you want to go.

My direction

Develop an idea together

The mission I want to explore

the class to build a world hello world where people and everyone can relax and play games while being happy and not stressing. the story moment that can be played in the moment is the world it can be built by you or those around you.

My pitch

my purpose is to help those around me with my team and getting better together by learning everything and sharing that knowledge with others. the evidence I bring is those around me that have helped me and many others that needed help. only help needed is being able to listen and focus cause my mind drifts when people talk for a while, and I slowly lose interest in the topic. my next action is to try and better my knowledge and focus.

Conversations and decisions

I did this at home but when I did this in class i talked to my team which consisted of Mio Jonathan Paul and Isaias

Agree on the work.

Team name / solo mission

Hello World

Agreed lead / my name if solo

Jonathan

Accepted members and contributions

Jonathan The leader of the team helps with the white board and lets us know what to do while he helps us work
Mio, she helps with the code and white board sometimes the discord for the screen shots
Paul helps with the screen shots white board and discord
Isaias helps with the screen shots white board and discord
Daniel helps with the code and the white board and sometimes the discord for the screen shots
AI the helper helps with the code or answers question if we are falling behind and need to catch up quick

How the literature strengthens this team

two reading insights would be the work or assignment for the week the second one is the board and the assignment instructions. working decisions we inform are the instructions for the assignment and what to put in the GitHub repository's.

Communication and check-in plan

the remote work will live in the class or at home if not finished in class. the results will be compared near the end of class

Team GitHub URL, or Working solo

Not recorded

Make the Attention Accord.

Purpose and smallest playable result

Not recorded

My attention promise

Not recorded

Time and dependency plan

Not recorded

Board explanation and contributors

Not recorded

Translate the mission into code.

My story-to-code map

Not recorded

What I am borrowing and why

Not recorded

Object lifetime and responsibility

Not recorded

Make one moment playable.

What I expect to happen

Not recorded

What I built and where it lives

Not recorded

A difficulty and my response

Not recorded

Test what you are claiming.

My test record

Not recorded

My improvement experiment

Not recorded

Promised versus returned evidence

Not recorded

Return with work you can explain.

My final access and file check
